DETAILED ACTION

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1648.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 8, 9, 11, 12, drawn to a composition comprising a reaction mixture wherein the NS1 is protein of Influenza A.

Group II, claim(s) 1, 5-8, 10-12, drawn to a composition comprising a reaction mixture wherein the NS1 is protein of Influenza B.

Group III, claim(s) 13-31, drawn to method of identifying compounds having inhibitory activity against influenza virus.

Group IV, claim(s) 32-34, drawn to method of identifying compounds having inhibitory activity against influenza virus via NMR.

Group V, claim(s) 35-37, drawn to drawn to method of preparing a composition for inhibiting replication of influenza virus.

Group VI, claim(s) 38-42, drawn to method of identifying compounds having inhibitory activity against influenza virus via crystallography.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I is known in the prior art as

Art Unit: 1648

evidence by Wang et al (Virology, 1992, Vol. 223, pp. 41-50) wherein the reference teaches NS1 domain of influenza A and its binding to dsRNA (see the abstract); or see Lu et al (Virology, 1995, Vol. 214, pp. 222-228) wherein the NS1 protein binding to dsRNA is taught (see the abstract). The cited evidence prove that the technical feature of Group I does not make a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
